# WHAT TO EXPECT

## Understanding delivered Collaboration delivered Care delivered

Through proper understanding and providing the right fitting equipment, right on time, right first time, we can **deliver better days.**

Our first priority in working with you is to fully understand the person behind the need. Taking the time to understand their goals, dreams and experiences, reveals their true needs. Only then can we apply our own experience to help guide our clients in making informed decisions about their goals and the right equipment to achieve them.

### MOBILITY

#### Fit for purpose

Matching the right chair to your needs is essential. For some it's enough to be able to cross the street. Others want to cross countries, roll on beaches or race down hills. Wherever you're going, whatever you're doing there's a chair for that.

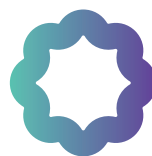

### COMFORT

#### Fit for comfort

For just about all of us, mobility is life. And if you count on your wheelchair to maintain mobility it better be comfortable! Comfortable to sit and roll in. Comfortable to get in and out of. The only way to achieve maximum comfort and mobility is careful measurement and proper fitting.

### DURABILITY

#### Fit to last

Quality matters. Especially in a big-ticket item like a wheelchair. A faulty chair in a boardroom can be just as inconvenient as on a beach. Just like any daily life tool, your wheelchair should be made for you and made to last!

### PORTABILITY

#### Fit to live with

Quality matters. Especially in a big-ticket item like a wheelchair. A faulty chair in a boardroom can be just as inconvenient as on a beach. Just like any daily life tool, your wheelchair should be made for you and made to last!

We're going 1000 smiles an hour to make sure you don't have to worry about your equipment. Equipment that fits better, feels better and works better.

## GUIDING PRINCIPLES

We start every day excited to find new ways to support real and lasting care. Going the extra mile for the smile is more than our mantra: It's how we measure your satisfaction and our performance.

**Listen well:** We aim to win trust fast by being hungry, humble and smart. We listen closely and communicate clearly.

**Work at the speed of right:** We move with speed and precision as creative problem solvers. But we never cut corners or make excuses.

**Sweat the details:** Thorough attention to detail is everything. We solve problems as a team – leveraging our internal experts.

**Acknowledge every one:** We're never too busy to show we care. We show respect for our customers and fellow team members – helping each other to grow.

**Deliver joy:** Bring sunshine! We create memorable experiences distinguished by happiness, fun and creativity with a spirit of generosity.
